

Refund Policy

Synthetic enterprise knowledge-base content for the Enterprise Knowledge & Support Copilot.

Eligibility

Refund eligibility depends on payment capture status, order status, cancellation conditions, and applicable product rules. A payment that never captured is not processed as a normal captured-payment refund.

Refund process

Verify order, payment_id, capture state, and eligible refund amount. Submit the request through the approved support workflow.

Expected timing

Refund completion depends on payment method and financial institution. Agents should provide the approved policy range rather than promise an exact posting time.

Exceptions

Partial refunds, duplicate charges, and disputed transactions require additional validation and may need payments operations review.
