

Support SLA Policy

Synthetic enterprise knowledge-base content for the Enterprise Knowledge & Support Copilot.

Priority targets

P1 / SEV-1: initial response 15 minutes; continuous incident handling.

P2 / SEV-2: initial response 1 hour; same business day where possible.

P3 / SEV-3: initial response 4 business hours; target resolution 2 business days.

P4 / SEV-4: initial response 1 business day; target resolution 5 business days.

SLA handling

SLA clocks begin when a valid support case is created. Waiting for customer information may pause the resolution clock when the workflow explicitly records the waiting state.
